

Step 1: Kisi aur branch pe switch ho jao

```
git switch main
```

Step 2: Local branch ko force delete karo

```
git branch -D (branch name jisy delete karna hai)
```

Step 3: Remote tracking branches ko clean karo

```
git remote prune origin
```

Note:Ye command stale remote branches (jaise origin/redux) hata dega

Step 4: Check ke koi branch nahi bachi jisy delete kiya hai

```
git branch          # local branches
```

```
git branch -r       # remote branches
```

Step 5: Try switching to delete branch (verify deletion)

branch delete successfully
