WORK EXPERIENCE

Apps4U

Frontend Web Developer

2024 - 2025

- Developing a variety of responsive layouts with Material UI to enhance the user experience across devices.
- Implementing form validation to ensure accurate data entry and reduce errors.
- Integrating a RESTful API to streamline communication between the front-end and back-end systems.

Global Software Consulting

Frontend Web Developer

2023 - 2024

- I worked on the Factory Girl project at Global Software Consulting.
- I created multiple responsive layouts using Material UI.
- Set up theming for consistent UI styling across the app.
- Integrated language-switching functionality using i18n for multi-language support.
- Integrated Restful API.

Emi Fusion

Internee

2023 - 2023

- Learned HTML, CSS, Material UI, and JavaScript knowledge.
- Learned React.js and integrated the React app with front-end frameworks such as Material UI.
- Learned how to handle state with a redux and redux toolkit in a react app.
- Learned how to validate forms with the help of Formik.
- Learned SASS features such as variables, mixins, and nested styles to improve development efficiency.

EDUCATION

University of Central Punjab

Bachelor of Science in Computer Science

2017 - 2021

PROJECTS

E-commerce

- I have created an e-commerce website where I have developed APIs for login, signup, forgot password, and reset password using Node.js and MongoDB. I have also implemented these APIs on the front end using React.js, I have developed APIs for adding, deleting, editing, and updating products and implemented them as well.

Weather App

- I have created a weather API project in which, when you enter the name of any city, it will provide information about the pressure and temperature. In this project, I have used React.js and Material UI.

Expense Tracker Web

- I have created an expense tracker web using React JS and Material-UI (MUI). This app allows the user to input a date when the expense was incurred the user can also input the expense amount and provide a description for the expense. In this project, we add, delete, edit, or update expenses

SKILLS

- Front-end: HTML, CSS, Material UI, JavaScript, React.js, and Next.js
- Back-end: Node.js, Express.js, Mongo DB and RESTful API Design
- Tools: Git, Github, Vs Code
